Python Data Science Course

Master the skills of Python Data Science with this certification Program. Learn from the top industry experts with 1:1 mentorship.

Hottest **Job of 21st Century**

1.5 Million Job Postings

There is a global estimate of 1.5 million job postings for Python Data Science roles by 2024

Skill Development

Python Data Science professionals are equipped with various relevant skills fetching lucrative job offers

Growing Python Industry

42.2% CAGR in the global Python Data Science industry

Future-oriented Career

Python Data Science is a budding field; a head start will prove to be beneficial

Popular Degree

34% of Python Data Science professionals are certified

High Demand

By 2024, India and US will face a demand-supply gap of 220,000 Python Data Science professionals

Our **Credentials**

About Program

This online Python Data Science Course aims for you to master the basic and advanced skills in the various tools and technologies involved in the field of Python and Data Science

Key Highlights

- ✓ 50 Hrs Live sessions across 2 months
- ✓ 15+ Industry Projects & Case Studies
- ✓ 24*7 Support
- ✓ No Cost EMI Option
- ✓ 60 Hrs Project & Exercises
- ✓ One-on-One with Industry Mentors
- ✓ Resume Preparation and LinkedIn Profile Review
- ✓ Designed for Working Professionals & Freshers

Program Pedagogy

Instructor-led Training

Get trained by top industry experts

1:1 Personalized Learning

Hands-on exercises, project work, quizzes, and capstone projects

Self-paced videos

Learn at your own pace with world-class content

Projects and Exercises

Get real-world experience through projects

Hackathons

Get a sense of how real projects are built

Peer Networking and Group Learning

Improve your professional network and learn from peers

Gamified Learning

Get involved in group activities to solve real-world problems

Live Courses

- Live Courses
- Self-paced

Module 1

Introduction to Python and IDEs

The basics of the Python programming language, how you can use various IDEs for Python development like Jupyter, Pycharm, etc.

Module 2

Python Basics

Variables, Data Types, Loops, Conditional Statements, functions, decorators, lambda functions, file handling, exception handling ,etc.

Module 3

Object Oriented Programming

Introduction to OOPs concepts like classes, objects, inheritance, abstraction, polymorphism, encapsulation, etc.

Hands-on Sessions And Assignments for Practice – The culmination of all the above concepts with real-world problem statements for better understanding.

Module 4

Data Handling with NumPy

- NumPy Arrays, CRUD Operations, etc.
- Linear Algebra – Matrix multiplication, CRUD operations, Inverse, Transpose, Rank, Determinant of a matrix, Scalars, Vectors, Matrices.

Module 5

Data Manipulation Using Pandas

- Loading the data, data frames, series, CRUD operations, splitting the data, etc.

Module 6

Data Preprocessing

- Exploratory Data Analysis, Feature engineering, Feature scaling, Normalization, standardization, etc.
- Null Value Imputations, Outliers Analysis and Handling, VIF, Bias-variance trade-off, cross-validation techniques, train-test split, etc.

Module 7

Data Visualization

- Bar charts, scatter plots, count plots, line plots, pie charts, donut charts, etc. with Python matplotlib.
- Regression plots, categorical plots, area plots, etc, with Python seaborn.

Module 8

Python Data Science Capstone Project

The Data Science capstone project focuses on establishing a strong hold of analyzing a problem and coming up with solutions based on insights from the data analysis perspective. The capstone project will help you master the following verticals:

- Bar charts, scatter plots, count plots, line plots, pie charts, donut charts, etc. with Python matplotlib.
- Regression plots, categorical plots, area plots, etc, with Python seaborn.

Module 9

Business Case Studies

Housing – This real estate case study will guide you towards real world problems, where a culmination of multiple features will guide you towards creating a predictive model to predict housing prices.

Job Readiness

- Job Search Strategy
- Resume Building
- Linkedin Profile Creation

Skills to Master

- | | |
|--------------------|-------------------------|
| • Python | • Data Science |
| • Data Analysis | • Data Wrangling |
| • Machine Learning | • Prediction algorithms |
| • Model | • Data visualization |

Tools to Master

Projects cover the following industries:

Retail

Social Media

Supply Chain

Entrepreneurship

E-commerce

Banking

Healthcare

Insurance

Housing Price Prediction

In this project on housing price prediction, work with a house price dataset and predict the sale price for each house with 79 explanatory variables describing every aspect of the houses.

HR Analytics

Learn to work with the HR Analytics dataset and understand how methodologies can help you to re-imagine HR problem statements. Understand the features of the dataset and in the end, evaluate the model by metric identification process.

Analyzing the trends of COVID-19

Given data about COVID 19 patients, write code to visualize the impact and analyze the trend of rate of infection and recovery as well as make predictions about the number of cases expected a week in future based on the current trends

Customer_Churn

You are the Data Scientist at a telecom company “Neo” whose customers are churning out to its competitors. You have to analyse the data of your company and find insights and stop your customers from churning out to other telecom companies

About **Intellipa**at

Intellipaat is one of the leading online training providers, with more than 10 million learners in over 155 countries. We are on a mission to democratize education because we believe that everyone has the right to quality education.

We create courses in collaboration with top universities and MNCs focused on employability, including iHUB IIT Roorkee, EICT IIT Guwahati, IITM Pravartak, IIM Ranchi, IIT Jammu, VNIT Nagpur, IU Germany, University of Essex, University of Liverpool, Microsoft, and others.

Our courses come with 24/7 support and are delivered by Subject Matter Experts (SMEs). These courses help learners increase their employability, and our outstanding career services help them jump-start their careers in their dream jobs.

```
modifier_ob.select=1
bpy.context.scene.objects.active = modifier_ob
print("Selected" + str(modifier_ob)) # modifier ob is
#mirror_ob.select = 0
#bpy.context.selected_objects[0]
```
